Fáilte go dtí 4ú Nuachtlitir Staidéar Gnó na bliana acadúla seo. Tugann ár Nuachtlitir mhíosúil forléargas ar roinnt den nuacht agus de na himeachtaí a bhaineann le Foireann Staidéar Gnó an

Seimineár Gréasáin Foghlaim Chumaisc

Bhí ár n-imeacht ar líne 'Foghlaim Chumaisc do Mhúinteoirí Staidéar Gnó' ar siúl Dé Máirt an 24 Samhain 2020 agus bhí níos mó ná 300 múinteoir cláraithe. Ócáid fhaisnéiseach agus spéisiúil a bhí sa seimineár gréasáin, inar tugadh cuireadh do mhúinteoirí machnamh ar ghnéithe éagsúla den Foghlaim Chumaisc agus iad ag pleanáil a gcur chuige i leith teagaisc agus foghlama sna Ranna Staidéar Gnó.

1 Provide students with an agenda and a list of discussion questions ahead of time
Students will feel more comfortable if they have what to expect from an online blended lesson.

2 Communicate your expectations for participation and behaviour online
Learning online is not the same as learning in person. Teachers need to be clear about their expectations, and providing clear guidelines to engage in the new learning landscape.

3 Ask students to generate their own discussion questions
Ask students to come to the lesson with at least one question they would like to discuss.

4 Start every lesson with an icebreaker question or a quick check-in
Instead of jumping right into academic work, teachers should begin with a fun, informal question that helps students to feel more comfortable.

5 Use the chat window strategically
Just like in a Business Studies classroom, students need a moment to process a question and formulate their response. Encourage teachers to share their questions and prepare their discussion questions so that students can both use and hear it. Getting students to share their thoughts is powerful.

6 Host shorter sessions with fewer students, where possible
Teachers may prefer to offer one long synchronous session each week for their classes. However, group discussions are rarely as dynamic or equitable as small group discussions. It is possible to use small group sessions to allow for more frequent ways of sharing teacher time in an online lesson.

7 Ask students to assess their participation online
End your online lesson by asking students to take a moment to assess and reflect on their participation online. Self-assessment is an important strategy that encourages students to thoughtfully assess their skills. They might use such self-assessment and reflection activities to engage students in discussion about their learning!
