

Sustainability Team Challenge

Working as a team

- Choose a product, service or element of the build environment at the Rediscovery Centre that you feel incorporates the principles of sustainable design.
- Assess sustainability of the product / service

<p>Write a riddle about your chosen product / service / item.</p> <p>This will be read out to other teams to see if they can guess your chosen item.</p>	
<p>Describe your chosen product / service / item</p>	<p>What materials were used / reused in the manufacture of this item?</p>
<p>What societal issue does the product try to solve?</p>	<p>How does the product solve this issue?</p>
<p>Assess the sustainability of the product, e.g.</p> <ul style="list-style-type: none"> - Providing a solution to the chosen issue - Functionality and use - Quality and durability - Options for product at end of lifecycle - Environmental impacts during manufacture / use / end of lifecycle - Societal benefits / impacts - Value for money 	
<p>Total Marks for the Item (/ 10)</p>
